

# Lightroom Skills

If you are looking for a way to organise a growing collection of images and a tool that provides powerful and intuitive editing, Adobe Lightroom is your best choice. It's modestly priced and easy to use but most of all, it allows you to easily manage huge collections of images with ease. It can be used stand-alone or as a part of Adobe's growing mobile system to allow sharing and editing on-the-run.

Despite Lightroom's ease of use, getting started with any new program can be daunting. So why not make it easy by joining us for a day packed full of help and advice. We will tune your set-up ready for the thousands of pictures you will be loading and editing over the years to come. By the end of the day you will be confidently importing images and performing a wide range of adjustments, helping you make the very best of your images.

## Agenda

We aim to cover the following topics during the day but additions and alterations can be agreed by consensus on the day.

- Introduction to Lightroom, how it works and why it's different from other editors
- Creating and understanding the catalogue
- Importing your images and selecting the right options
- Organising and finding your images
- Lots of editing, including global and local adjustments, blemish fixing and B&W
- Getting your images out of Lightroom, exporting and printing

## Who Should Attend

This workshop is designed for beginners and self-taught intermediates wanting to gain deeper insight into the fundamentals. You will be working on sample images, or your own if you prefer, in a small group, with plenty of 'hand holding' with one of the best teachers in the business.

## Group size, Location & Facilities

The group size is limited to **10** places to ensure plenty of help and support. You will be using your own computer loaded with your own copy of Lightroom. You will receive a detailed printed workbook so you don't have to write anything down but it is also a great place to take extra notes. All the sample images we will be provided on the day.

Starting at 9.15- 9.30am with introductions, our first mornings sessions will be split up to take advantage of tea & coffee, We will also have a short break for lunch (included) followed by afternoon breaks, aiming to finish the day at 5.30pm.

This 1-day workshop will help you use your valuable time better. Give yourself the focused time you need to get to grips with the basics and gain confidence with your computer.

Carla Regler &  
Adrian Beasley
